

## **TILE DOCTOR GUIDE TO: SHINING A FLOOR**

### **WHY SHINE A FLOOR?**

- It enhances the look of the room and gives it a much cleaner feeling all around.
- Shiny, clean floors are not only of aesthetic importance, but for sanitary reasons as well.

### **CHECKLIST FOR SHINING AND MAINTAINING A FLOOR:**

- Suitable Tile Doctor product
- Lint free cloth or mop
- Buffing pad

To shine a floor is a simple process, and the reward speaks for itself. Many beautiful tile colors are not shiny, however, after they have been installed and treated with a high-quality tile sealer, the tiles can be shined using Tile Doctor EeziShine. Be sure to treat the tiles regularly to maintain a long lasting shine.

### **TILE DOCTOR EEZISHINE:**

A waterbased, clear, non-slip, liquid floor polish which is easy to apply and lasts for up to three months. It is designed for the protection and maintenance of surfaces which have been pre-sealed, especially those that need protection against abrasion. This product is non-yellowing. It is for use on interior surfaces only.

**FOR USE ON:** Vinyl, linoleum, sealed cement, sealed wood, pre-sealed quarry tiles, sealed terracotta, pre-sealed concrete tiles, sealed slate, sealed slasto, etc.

### **PREPARATION IS EVERYTHING:**

- Surfaces must be clean and completely free from loose dirt and dust.
- Wash the surface with clean water and allow to dry before applying EeziShine.

### **APPLICATION:**

- For vinyl tiles and sheeting, this product can be used undiluted. For polished and glazed tiles dilute 25ml of EeziShine with 5lt water.
- Apply a thin, even coat using a dry squeegee or lambswool applicator; but do not rub.
- Further applications may be applied at 30-40 minute intervals, if extra protection is required or if the desired amount of shine is not achieved after the first application, in an opposite direction to the previous coat.

### **MAINTENANCE:**

- Sweep or mop the floor regularly with a damp mop.
- Re-apply EeziShine if needed at 2 – 3 month intervals.
- After several applications, excessive wax build-up can be removed, if necessary, with Genkem Nova 9 Emulsion Polish Remover.

### **DRYING TIMES:**

- Allow  $\pm$ 45 minutes drying time.
- Water must not be allowed on the newly coated surface for at least 12 hours after application.
- Drying times may be extended during wet and cold weather.

**COVERAGE:**

- 10-12m<sup>2</sup>/lt, depending on surface porosity.

**CLEAN UP:**

- Tools, equipment and spills can be cleaned easily with warm, soapy water before EeziShine dries.

**SPECIAL PRECAUTIONS:**

- Do not use at temperatures below 5°C.

**STORAGE:**

- Keep out of reach of children, pets and uninformed persons.
- Store in a cool, dry place and ensure the cap is tightly secured. Check the product for any leakages.

**HEALTH & SAFETY:**

- In case of accidental contact with eyes or skin, wash the affected area with plenty of water and seek medical advice.
- This product is harmful if swallowed. Do not induce vomiting; call your local poison centre or doctor.
